Dick Kreidel, ASSA ABLOY	Barry Grover, Allegion
Dave Timmerman, ASSA ABLOY	John Cringole, Horton
Karen Bishop, BHMA	Refugio Guadalajara, Optex
Michael Tierney, BHMA	

A156.19 for Low Power Operated Doors November 28, 2018

The meeting was called to order at 11:08 a.m. by subcommittee chairman Paul Durgin; the meeting minutes from October 11, 2018 were approved as written.

A set of proposals from Allegion were reviewed leading to the following changes:

- The definition of Knowing Act was refined as shown in the draft to provide for additional methods such as certain cell phone apps.
- Table 1 would be expanded to 400 pounds in 50 pound increments; Barry would provide details.
- Updated ANSI Z535.4 reference as shown in the draft; Barry would confirm paragraph references were still valid.

Reviewed and approved new wording in 4.1 for knowing act switch installation as shown in the draft. Although there was some question of whether installation details should be included in a performance standard, the group felt it was better to include the information because it was often ignored otherwise and was consistent with other Section P standards.

Reverted to original language in 4.3.

The next meeting would be held along with A156.38 at the BHMA Winter Meeting in Tampa January 31, 2019.

The meeting was adjourned at 12:18 p.m.
