

BHMA® Announces 2020 Virtual Fall Meeting

Builders Hardware Manufacturers Association Hosts Annual and Committee Meetings

New York, NY (October 12, 2020) -- The Builders Hardware Manufacturers Association (BHMA®) will hold its annual Fall Meeting from October 20th through the 22nd virtually. During this time, BHMA® members will attend the annual membership meeting, technical sessions and various other committee meetings.

This year's Fall Meeting will include discussions regarding the following standards:

- A156.2 – Exit Devices
- A156.13 – Mortise Locks
- A156.32 – Integrated Door Openings and Assemblies
- Section P – Power Operated Doors & Components
- Residential Standards

In addition to standards development activity, the Codes, Government & Industry Affairs and the Marketing Communications Committees will meet. These meetings will be held in conjunction with updates about BHMA's Certified Products Directory (CPD), and guest speaker presentations from BHMA's independent laboratories that certify builders hardware and from others.

“While we cannot all be together in person, this virtual Fall Meeting will continue to serve as a means to progress BHMA's codes and standards development for the association's 40+ ANSI/BHMA standards,” said BHMA® Executive Director Ralph Vasami. “The annual Fall Meeting is a time for industry leaders to come together and discuss the future of builders hardware and building safety and security as the industry continues to evolve.”

For more information about the 2020 BHMA® Fall Meeting, or for a complete schedule of events, please contact Larry McClean at lmcclean@kellencompany.com. To learn more about BHMA®, visit www.buildershardware.com.

About the Builders Hardware Manufacturers Association (BHMA): The Builders Hardware Manufacturers Association (BHMA®) is an industry leader in building safety and security. BHMA® is the only organization accredited by the American National Standards Institute (ANSI) to develop and maintain performance standards for locks, closers, exit devices and other builder's hardware. The widely known ANSI/BHMA® A156 series of standards describes and establishes the features and criteria for specific types of hardware products. In addition, BHMA® sponsors third-party certification of hardware products, which is a requirement for a product to bear the “BHMA® Certified” mark — ensuring that the product meets the ANSI/BHMA® standard. For more information on BHMA®, please write to BHMA®, 355 Lexington Avenue, 15th Floor, New York, NY, 10017 or visit our website at www.buildershardware.com.
